BIOELECTROCHEMISTRY AND BIOENERGETICS

Subject Index of Volume 46

ADP
Treatment of zymosan-activated HL-60 cells with low frequencies electric fields does not change cellular ATP and ADP levels and reactive oxygen species (Sontag) 255
Adsorption
Adsorption of single-stranded and double-helical polyadenylic acid at the mercury drop electrode (Hanák, Vetterl) 7
Alkanethiol
Alkyl chain length effect on the horseradish peroxidase-catalytic reduction of hydrogen peroxide mediated by methylene blue at alkanethiol self-assembled monolayer electrodes (Qian et al.) 193
Ammonium
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Artificial acceptors of electrons
Monoamine oxidase catalysis on electrodes modified with artificial acceptors of electrons (Bachurin et al.) 185
ATP
Treatment of zymosan-activated HL-60 cells with low frequencies electric fields does not change cellular ATP and ADP levels and reactive oxygen species (Sontag) 255
ATP synthesis
Biological mechanochemiemission and bioenergetics (Orel) 273
Azaheme
Electrochemistry of myoglobins reconstituted with azahemes and mesohemes (Mie et al.) 175

Bacteria
Chemiluminescence patterns from bacterial cultures undergoing bacteriophage induced mass lysis (Vogel et al.) 59
Involvement of the cell membrane in chemiluminescence patterns from bacterial cultures (Vogel, Süssmuth) 65
Bacterial bioluminescence
In vitro bacterial bioluminescence coupled with a mediated electrochemical process of flavin on a viologen polymer electrode (Karatani, Konaka) 227
Bacteriophage
Chemiluminescence patterns from bacterial cultures undergoing bacteriophage induced mass lysis (Vogel et al.) 59
Bilayer lipid membrane
Interfacial tension of the two-component bilayer lipid membrane modelling of cell membrane (Petelska, Figaszewski) 199
Bilayer lipid membranes
The electrostriction, surface potential and capacitance relaxation of bilayer lipid membranes induced by tetracaine (Hianik et al.) 1
Bioelectrocatalysis
Monoamine oxidase catalysis on electrodes modified with artificial acceptors of electrons (Bachurin et al.) 185
Electrochemical measurements of glucose dehydrogenase activity exhibited by *Escherichia coli* cells; effects of the additions of pyrroloquinoline quinone, magnesium or calcium ions and ethylenediaminetetraacetic acid (Iswantini et al.) 249
Bioelectrochemical sensor
Direct bioelectrochemical monitoring of choline oxidase kinetic behaviour in Langmuir–Blodgett nanostructures (Girard-Egrot et al.) 39
Bioenergetics
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Biological mechanochemiemission
Biological mechanochemiemission and bioenergetics (Orel) 273
Biomagnetic stimulation
Molecular change due to biomagnetic stimulation and transient magnetic fields: mechanical interference constraints on possible effects by cell membrane pore creation via magnetic particles (Vaughan, Weaver) 121
Biomass estimation
The influence of electrode polarisation on dielectric spectra, with special reference to capacitive biomass measurements. I. Quantifying the effects on electrode polarisation of factors likely to occur during fermentations (Davey, Kell) 91
The influence of electrode polarisation on dielectric spectra, with special reference to capacitive biomass measurements: (II) Reduction in the contribution of electrode polarisation to dielectric spectra using a two-frequency method (Davey, Kell) 105
Biomimetic nanostructure
Direct bioelectrochemical monitoring of choline oxidase kinetic behaviour in Langmuir–Blodgett nanostructures (Girard-Egrot et al.) 39
Biosensor
Electrochemical determination of superoxide and nitric oxide generated from biological samples (Mesároš et al.) 33
Biosensors
Biofunctional hybrid structures—cell–silicon hybrids for applications in biomedicine and bioinformatics (Wolf et al.) 215
Bone and keratin
A comparison of dielectric relaxation of bone and keratin (Marzec) 29
Buffering proteins
Modelling oscillations of calcium and endoplasmic reticulum transmembrane potential. Role of the signalling and buffering proteins and of the size of the Ca^{2+} sequestering ER subcompartments (Marhl et al.) 79

Ca^{2+} ions
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293
Calcium oscillations
Modelling oscillations of calcium and endoplasmic reticulum transmembrane potential. Role of the signalling and buffering proteins and of the size of the Ca^{2+} sequestering ER subcompartments (Marhl et al.) 79

Cardiovascular system
Electrochemical determination of superoxide and nitric oxide generated from biological samples (Mesároš et al.) 33
Catecholamines
Differentiation of chromaffin cells by extremely low frequency magnetic fields changes ratios of catecholamine type messenger (Verdugo-Díaz et al.) 297
Cell lysis
Chemiluminescence patterns from bacterial cultures undergoing bacteriophage induced mass lysis (Vogel et al.) 59
Cell membrane
Chemiluminescence patterns from bacterial cultures undergoing bacteriophage induced mass lysis (Vogel et al.) 59
Involvement of the cell membrane in chemiluminescence patterns from bacterial cultures (Vogel, Süssmuth) 65
Molecular change due to biomagnetic stimulation and transient magnetic fields: mechanical interference constraints on possible effects by cell membrane pore creation via magnetic particles (Vaughan, Weaver) 121
Cell–silicon hybrids
Biofunctional hybrid structures—cell–silicon hybrids for applications in biomedicine and bioinformatics (Wolf et al.) 215
Charge-transfer
A proposed model for electron conduction in DNA based upon pairwise anion π stacking: electron affinities and ionization potentials of the hydrogen bonded base pairs (Chen, Chen) 15
Chemiluminescence
Chemiluminescence patterns from bacterial cultures undergoing bacteriophage induced mass lysis (Vogel et al.) 59
Involvement of the cell membrane in chemiluminescence patterns from bacterial cultures (Vogel, Süssmuth) 65
Chloride pump
Photoelectric response of halorhodopsin from *Natronobacterium pharaonis* (Koyama et al.) 289
Chloroplast
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Cholesterol
Interfacial tension of the two-component bilayer lipid membrane modelling of cell membrane (Petelska, Figaszewski) 199
Choline oxidase
Direct bioelectrochemical monitoring of choline oxidase kinetic behaviour in Langmuir–Blodgett nanostructures (Girard-Egrot et al.) 39
Chromaffin cells
Differentiation of chromaffin cells by extremely low frequency magnetic fields changes ratios of catecholamine type messenger (Verdugo-Díaz et al.) 297
Computerized videomicroscopy
Orientation of photoreceptor cells in static electric fields (Pologea-Moraru et al.) 237
Contrast agents
Interactions between magnetic resonance imaging contrast agents and phospholipid monolayers (Moncelli et al.) 205
Cyclic voltammetry
Electrochemical reduction of 2,5-dimethoxy nitrobenzenes: nitro radical anion generation and biological activity (Álvarez-Lueje et al.) 21
Cytochrome oxidase
Frequency dependence of cytochrome oxidase activity in magnetic fields (Blank, Soo) 139
Cytosolic calcium oscillator
Periodic forcing of intracellular calcium oscillators Theoretical studies of the effects of low frequency fields on the magnitude of oscillations (Galvanovskis, Sandblom) 161
Dark current
Orientation of photoreceptor cells in static electric fields (Pologea-Moraru et al.) 237
Denaturation process
A comparison of dielectric relaxation of bone and keratin (Marzec) 29
The influence of hydration and ionizing radiation on denaturation process in keratin (Marzec) 279
Dielectric properties
A comparison of dielectric relaxation of bone and keratin (Marzec) 29
The influence of hydration and ionizing radiation on denaturation process in keratin (Marzec) 279
Dielectric spectroscopy
The influence of electrode polarisation on dielectric spectra, with special reference to capacitive biomass measurements. I. Quantifying the effects on electrode polarisation of factors likely to occur during fermentations (Davey, Kell) 91
The influence of electrode polarisation on dielectric spectra, with special reference to capacitive biomass measurements: (II) Reduction in the contribution of electrode polarisation to dielectric spectra using a two-frequency method (Davey, Kell) 105
Differential capacitance
Adsorption of single-stranded and double-helical polyadenylic acid at the mercury drop electrode (Hanák, Vetterl) 7
Differential pulse polarography
Characterisation of human adult kidney Cd,Zn–metallothioneins by differential pulse polarography (Nieto et al.) 45
Dipole potential
The electrostriction, surface potential and capacitance relaxation of bilayer lipid membranes induced by tetracaine (Hianik et al.) 1
DNA
A proposed model for electron conduction in DNA based upon pairwise anion π stacking: electron affinities and ionization potentials of the hydrogen bonded base pairs (Chen, Chen) 15

EA
A proposed model for electron conduction in DNA based upon pairwise anion π stacking: electron affinities and ionization potentials of the hydrogen bonded base pairs (Chen, Chen) 15
Electrical potential
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Electric fields
Treatment of zymosan-activated HL-60 cells with low frequencies electric fields does not change cellular ATP and ADP levels and reactive oxygen species (Sontag) 255
Electric pulses
Increase of *Saccharomyces cerevisiae* plating efficiency after treatment with bipolar electric pulses (Fologea et al.) 285
Electrochemical cell
Photoelectric response of halorhodopsin from *Natronobacterium pharaonis* (Koyama et al.) 289
Electrochemotherapy
Dynamic gamma camera studies of ^{111}In–bleomycin complex in normal and glioma bearing rats after in vivo electropermeabilization using exponential high-voltage pulses (Engström et al.) 241
Electrode double layer
Adsorption of single-stranded and double-helical polyadenylic acid at the mercury drop electrode (Hanák, Vetterl) 7
Electrode polarisation
The influence of electrode polarisation on dielectric spectra, with special reference to capacitive biomass measurements. I. Quantifying

the effects on electrode polarisation of factors likely to occur during fermentations (Davey, Kell) 91
The influence of electrode polarisation on dielectric spectra, with special reference to capacitive biomass measurements: (II) Reduction in the contribution of electrode polarisation to dielectric spectra using a two-frequency method (Davey, Kell) 105

Electroenzymocatalyzed reaction
Alkyl chain length effect on the horseradish peroxidase-catalytic reduction of hydrogen peroxide mediated by methylene blue at alkanethiol self-assembled monolayer electrodes (Qian et al.) 193

Electrofusion
Transfer of foreign receptors to living cell surfaces: the bioelectrochemical approach (Teissié) 115
Electropermeabilization and electrofusion of human lymphoma cells modified by proteolytic enzymes (Velizarov, Berg) 263

Electroinsertion
Transfer of foreign receptors to living cell surfaces: the bioelectrochemical approach (Teissié) 115

Electromagnetic fields
Analysis of the T cell activation signaling pathway during ELF magnetic field exposure, $p56^{lck}$ and $[Ca^{2+}]_i$-measurements (Lindström et al.) 129
Frequency dependence of cytochrome oxidase activity in magnetic fields (Blank, Soo) 139

Electroneutrality condition
Modelling oscillations of calcium and endoplasmic reticulum transmembrane potential. Role of the signalling and buffering proteins and of the size of the Ca^{2+} sequestering ER subcompartments (Marhl et al.) 79

Electron microscopy
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71

Electron-transfer rate constant
Electrochemistry of myoglobins reconstituted with azahemes and mesohemes (Mie et al.) 175

Electron transport
A proposed model for electron conduction in DNA based upon pairwise anion π stacking: electron affinities and ionization potentials of the hydrogen bonded base pairs (Chen, Chen) 15
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Frequency dependence of cytochrome oxidase activity in magnetic fields (Blank, Soo) 139
Monoamine oxidase catalysis on electrodes modified with artificial acceptors of electrons (Bachurin et al.) 185
In vitro bacterial bioluminescence coupled with a mediated electrochemical process of flavin on a viologen polymer electrode (Karatani, Konaka) 227

Electropermeabilization
Transfer of foreign receptors to living cell surfaces: the bioelectrochemical approach (Teissié) 115
Dynamic gamma camera studies of ^{111}In–bleomycin complex in normal and glioma bearing rats after in vivo electropermeabilization using exponential high-voltage pulses (Engström et al.) 241
Electropermeabilization and electrofusion of human lymphoma cells modified by proteolytic enzymes (Velizarov, Berg) 263

Electropermeation
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293

Electrophoretic mobility
Electrophoretic mobility variations of *Synechococcus* PCC 7942 plasmalemma vesicles with nitrogen source (Zinovieva et al.) 55

Electroporation
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293

Electropulsation
Transfer of foreign receptors to living cell surfaces: the bioelectrochemical approach (Teissié) 115

Electrostimulation
Increase of *Saccharomyces cerevisiae* plating efficiency after treatment with bipolar electric pulses (Fologea et al.) 285

Electrotransformation
Transfer of foreign receptors to living cell surfaces: the bioelectrochemical approach (Teissié) 115

Endoplasmic reticulum
Modelling oscillations of calcium and endoplasmic reticulum transmembrane potential. Role of the signalling and buffering proteins and of the size of the Ca^{2+} sequestering ER subcompartments (Marhl et al.) 79

Enniatin B
Interaction of panosialins with planar lipid bilayers (Grigoriev et al.) 151

Enzyme kinetic parameters
Direct bioelectrochemical monitoring of choline oxidase kinetic behaviour in Langmuir–Blodgett nanostructures (Girard-Egrot et al.) 39

Escherichia coli K12
Electrochemical measurements of glucose dehydrogenase activity exhibited by *Escherichia coli* cells; effects of the additions of pyrroloquinoline quinone, magnesium or calcium ions and ethylenediaminetetraacetic acid (Iswantini et al.) 249

External periodic forcing
Periodic forcing of intracellular calcium oscillators Theoretical studies of the effects of low frequency fields on the magnitude of oscillations (Galvanovskis, Sandblom) 161

Frequency dependence
Frequency dependence of cytochrome oxidase activity in magnetic fields (Blank, Soo) 139

Gadolinium chelates
Interactions between magnetic resonance imaging contrast agents and phospholipid monolayers (Moncelli et al.) 205

Gamma camera
Dynamic gamma camera studies of ^{111}In–bleomycin complex in normal and glioma bearing rats after in vivo electropermeabilization using exponential high-voltage pulses (Engström et al.) 241

Gamma irradiation
The influence of hydration and ionizing radiation on denaturation process in keratin (Marzec) 279

Glioma
Dynamic gamma camera studies of ^{111}In–bleomycin complex in normal and glioma bearing rats after in vivo electropermeabilization using exponential high-voltage pulses (Engström et al.) 241

Glucose dehydrogenase
Electrochemical measurements of glucose dehydrogenase activity exhibited by *Escherichia coli* cells; effects of the additions of pyrroloquinoline quinone, magnesium or calcium ions and ethylenediaminetetraacetic acid (Iswantini et al.) 249

Gram stain
Involvement of the cell membrane in chemiluminescence patterns from bacterial cultures (Vogel, Süssmuth) 65

Halorhodopsin
Photoelectric response of halorhodopsin from *Natronobacterium pharaonis* (Koyama et al.) 289

Hepatocyte
Interactions between magnetic resonance imaging contrast agents and phospholipid monolayers (Moncelli et al.) 205

HL-60 cells
Treatment of zymosan-activated HL-60 cells with low frequencies electric fields does not change cellular ATP and ADP levels and reactive oxygen species (Sontag) 255
Horseradish peroxidase
Alkyl chain length effect on the horseradish peroxidase-catalytic reduction of hydrogen peroxide mediated by methylene blue at alkanethiol self-assembled monolayer electrodes (Qian et al.) 193
HPLC
Differentiation of chromaffin cells by extremely low frequency magnetic fields changes ratios of catecholamine type messenger (Verdugo-Díaz et al.) 297
Human cells U 937
Electropermeabilization and electrofusion of human lymphoma cells modified by proteolytic enzymes (Velizarov, Berg) 263
Human metallothioneins
Characterisation of human adult kidney Cd,Zn–metallothioneins by differential pulse polarography (Nieto et al.) 45

^{111}In–bleomycin complex
Dynamic gamma camera studies of ^{111}In–bleomycin complex in normal and glioma bearing rats after in vivo electropermeabilization using exponential high-voltage pulses (Engström et al.) 241
Indium oxide
Electrochemistry of myoglobins reconstituted with azahemes and mesohemes (Mie et al.) 175
Interfacial tension
Interfacial tension of the two-component bilayer lipid membrane modelling of cell membrane (Petelska, Figaszewski) 199
Intracellular calcium
Analysis of the T cell activation signaling pathway during ELF magnetic field exposure, $p56^{lck}$ and $[Ca^{2+}]_i$-measurements (Lindström et al.) 129
IP
A proposed model for electron conduction in DNA based upon pairwise anion π stacking: electron affinities and ionization potentials of the hydrogen bonded base pairs (Chen, Chen) 15

K^+
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293
Keratin
The influence of hydration and ionizing radiation on denaturation process in keratin (Marzec) 279

Langmuir–Blodgett films
Direct bioelectrochemical monitoring of choline oxidase kinetic behaviour in Langmuir–Blodgett nanostructures (Girard-Egrot et al.) 39
Laser Doppler electrophoresis
Electrophoretic mobility variations of *Synechococcus* PCC 7942 plasmalemma vesicles with nitrogen source (Zinovieva et al.) 55
Lecithin
Interfacial tension of the two-component bilayer lipid membrane modelling of cell membrane (Petelska, Figaszewski) 199
Local anaesthetics
The electrostriction, surface potential and capacitance relaxation of bilayer lipid membranes induced by tetracaine (Hianik et al.) 1
Luminol-dependent chemiluminescence
Modification of production of reactive oxygen species in mouse peritoneal neutrophils on exposure to low-intensity modulated millimeter wave radiation (Gapeyev et al.) 267

Magnetic field
Molecular change due to biomagnetic stimulation and transient magnetic fields: mechanical interference constraints on possible effects by cell membrane pore creation via magnetic particles (Vaughan, Weaver) 121
Magnetic fields
Frequency dependence of cytochrome oxidase activity in magnetic fields (Blank, Soo) 139
Differentiation of chromaffin cells by extremely low frequency magnetic fields changes ratios of catecholamine type messenger (Verdugo-Díaz et al.) 297
Mediated electrochemical reaction
In vitro bacterial bioluminescence coupled with a mediated electrochemical process of flavin on a viologen polymer electrode (Karatani, Konaka) 227
Mediator
Monoamine oxidase catalysis on electrodes modified with artificial acceptors of electrons (Bachurin et al.) 185
Membrane activity
Interaction of panosialins with planar lipid bilayers (Grigoriev et al.) 151
Membrane potential
Modelling oscillations of calcium and endoplasmic reticulum transmembrane potential. Role of the signalling and buffering proteins and of the size of the Ca^{2+} sequestering ER subcompartments (Marhl et al.) 79
Mesoheme
Electrochemistry of myoglobins reconstituted with azahemes and mesohemes (Mie et al.) 175
Methylene blue
Alkyl chain length effect on the horseradish peroxidase-catalytic reduction of hydrogen peroxide mediated by methylene blue at alkanethiol self-assembled monolayer electrodes (Qian et al.) 193
Mg^{2+}
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293
Microelectrode
Electrochemical determination of superoxide and nitric oxide generated from biological samples (Mesároš et al.) 33
Millimeter waves
Modification of production of reactive oxygen species in mouse peritoneal neutrophils on exposure to low-intensity modulated millimeter wave radiation (Gapeyev et al.) 267
Mitochondria
Biological mechanochemiemission and bioenergetics (Orel) 273
Modulation
Modification of production of reactive oxygen species in mouse peritoneal neutrophils on exposure to low-intensity modulated millimeter wave radiation (Gapeyev et al.) 267
Molecular change
Molecular change due to biomagnetic stimulation and transient magnetic fields: mechanical interference constraints on possible effects by cell membrane pore creation via magnetic particles (Vaughan, Weaver) 121
Molecular dipole moment
The influence of hydration and ionizing radiation on denaturation process in keratin (Marzec) 279
Monoamine oxidase
Monoamine oxidase catalysis on electrodes modified with artificial acceptors of electrons (Bachurin et al.) 185
Mouse peritoneal neutrophil
Modification of production of reactive oxygen species in mouse peritoneal neutrophils on exposure to low-intensity modulated millimeter wave radiation (Gapeyev et al.) 267

Myoglobin
Electrochemistry of myoglobins reconstituted with azahemes and mesohemes (Mie et al.) 175

Na^+
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293
Natronobacterium pharaonis
Photoelectric response of halorhodopsin from *Natronobacterium pharaonis* (Koyama et al.) 289
Neural nets
Biofunctional hybrid structures—cell–silicon hybrids for applications in biomedicine and bioinformatics (Wolf et al.) 215
Nitrate transport system
Electrophoretic mobility variations of *Synechococcus* PCC 7942 plasmalemma vesicles with nitrogen source (Zinovieva et al.) 55
Nitric oxide
Electrochemical determination of superoxide and nitric oxide generated from biological samples (Mesároš et al.) 33
Nitrobenzenes
Electrochemical reduction of 2,5-dimethoxy nitrobenzenes: nitro radical anion generation and biological activity (Álvarez-Lueje et al.) 21
Nitro radical anion
Electrochemical reduction of 2,5-dimethoxy nitrobenzenes: nitro radical anion generation and biological activity (Álvarez-Lueje et al.) 21

Ouabaine
Orientation of photoreceptor cells in static electric fields (Pologea-Moraru et al.) 237
Oxygen consumption
Electrochemical reduction of 2,5-dimethoxy nitrobenzenes: nitro radical anion generation and biological activity (Álvarez-Lueje et al.) 21

Panosialins
Interaction of panosialins with planar lipid bilayers (Grigoriev et al.) 151
Peperomia metallica
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Pharmaceutical screening
Biofunctional hybrid structures—cell–silicon hybrids for applications in biomedicine and bioinformatics (Wolf et al.) 215
Phospholipid monolayer
Interactions between magnetic resonance imaging contrast agents and phospholipid monolayers (Moncelli et al.) 205
Photo-cleavage
Photoelectric behavior of supercoiled DNA and its applications in molecular biology (Zhang et al.) 145
Photocurrent
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71
Photoelectric behavior
Photoelectric behavior of supercoiled DNA and its applications in molecular biology (Zhang et al.) 145
Photoelectric response
Photoelectric response of halorhodopsin from *Natronobacterium pharaonis* (Koyama et al.) 289
Photoreceptor rods orientation
Orientation of photoreceptor cells in static electric fields (Pologea-Moraru et al.) 237
Plasmalemma vesicles
Electrophoretic mobility variations of *Synechococcus* PCC 7942 plasmalemma vesicles with nitrogen source (Zinovieva et al.) 55
Plating efficiency
Increase of *Saccharomyces cerevisiae* plating efficiency after treatment with bipolar electric pulses (Fologea et al.) 285
Polarizability
A comparison of dielectric relaxation of bone and keratin (Marzec) 29
Polyadenylic acid structure
Adsorption of single-stranded and double-helical polyadenylic acid at the mercury drop electrode (Hanák, Vetterl) 7
Protein tyrosine kinases
Analysis of the T cell activation signaling pathway during ELF magnetic field exposure, $p56^{lck}$ and $[Ca^{2+}]_i$-measurements (Lindström et al.) 129
Proteolytic enzymes
Electropermeabilization and electrofusion of human lymphoma cells modified by proteolytic enzymes (Velizarov, Berg) 263
Proton pump
Photoelectric response of halorhodopsin from *Natronobacterium pharaonis* (Koyama et al.) 289
Pyrroloquinoline quinone
Electrochemical measurements of glucose dehydrogenase activity exhibited by *Escherichia coli* cells; effects of the additions of pyrroloquinoline quinone, magnesium or calcium ions and ethylenediaminetetraacetic acid (Iswantini et al.) 249

Rat
Dynamic gamma camera studies of ^{111}In–bleomycin complex in normal and glioma bearing rats after in vivo electropermeabilization using exponential high-voltage pulses (Engström et al.) 241
Reactive oxygen species
Treatment of zymosan-activated HL-60 cells with low frequencies electric fields does not change cellular ATP and ADP levels and reactive oxygen species (Sontag) 255
Modification of production of reactive oxygen species in mouse peritoneal neutrophils on exposure to low-intensity modulated millimeter wave radiation (Gapeyev et al.) 267
Receptors
Transfer of foreign receptors to living cell surfaces: the bioelectrochemical approach (Teissié) 115
Redox potential
Electrochemistry of myoglobins reconstituted with azahemes and mesohemes (Mie et al.) 175
Redox reaction kinetics
Frequency dependence of cytochrome oxidase activity in magnetic fields (Blank, Soo) 139
Relaxation time
A comparison of dielectric relaxation of bone and keratin (Marzec) 29
Riboflavin-5′-monophosphate
In vitro bacterial bioluminescence coupled with a mediated electrochemical process of flavin on a viologen polymer electrode (Karatani, Konaka) 227

Saccharomyces cerevisiae
The influence of extracellular alkali and alkaline-earth ions on electropermeation of *Saccharomyces cerevisiae* (Muraji et al.) 293
SDS
Involvement of the cell membrane in chemiluminescence patterns from bacterial cultures (Vogel, Süssmuth) 65
Self-assembled monolayer
Alkyl chain length effect on the horseradish peroxidase-catalytic reduction of hydrogen peroxide mediated by methylene blue at alkanethiol self-assembled monolayer electrodes (Qian et al.) 193
Signalling proteins
Modelling oscillations of calcium and endoplasmic reticulum transmembrane potential. Role of the signalling and buffering proteins and of the size of the Ca^{2+} sequestering ER subcompartments (Marhl et al.) 79

Signal transduction
Analysis of the T cell activation signaling pathway during ELF magnetic field exposure, $p56^{lck}$ and $[Ca^{2+}]_i$-measurements (Lindström et al.) 129
Biofunctional hybrid structures—cell–silicon hybrids for applications in biomedicine and bioinformatics (Wolf et al.) 215
Simulations
Periodic forcing of intracellular calcium oscillators Theoretical studies of the effects of low frequency fields on the magnitude of oscillations (Galvanovskis, Sandblom) 161
Structured biological modelling
Biofunctional hybrid structures—cell–silicon hybrids for applications in biomedicine and bioinformatics (Wolf et al.) 215
Supercoiled DNA
Photoelectric behavior of supercoiled DNA and its applications in molecular biology (Zhang et al.) 145
Superoxide
Electrochemical determination of superoxide and nitric oxide generated from biological samples (Mesároš et al.) 33
Surface potential
The electrostriction, surface potential and capacitance relaxation of bilayer lipid membranes induced by tetracaine (Hianik et al.) 1
Synechococcus
Electrophoretic mobility variations of *Synechococcus* PCC 7942 plasmalemma vesicles with nitrogen source (Zinovieva et al.) 55

TCR
Analysis of the T cell activation signaling pathway during ELF magnetic field exposure, $p56^{lck}$ and $[Ca^{2+}]_i$-measurements (Lindström et al.) 129

Tetracaine
The electrostriction, surface potential and capacitance relaxation of bilayer lipid membranes induced by tetracaine (Hianik et al.) 1
The two-component bilayer lipid membrane
Interfacial tension of the two-component bilayer lipid membrane modelling of cell membrane (Petelska, Figaszewski) 199
Thylakoid membranes
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71

Ultrastructural changes
Stimulation of photocurrent in chloroplasts related to light-induced swelling of thylakoid system (Bulychev et al.) 71

Viologen polymer
In vitro bacterial bioluminescence coupled with a mediated electrochemical process of flavin on a viologen polymer electrode (Karatani, Konaka) 227

Yeast
Increase of *Saccharomyces cerevisiae* plating efficiency after treatment with bipolar electric pulses (Fologea et al.) 285

Zymosan
Treatment of zymosan-activated HL-60 cells with low frequencies electric fields does not change cellular ATP and ADP levels and reactive oxygen species (Sontag) 255
